Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 45-47 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Tully et al-4,387,195.

Tully discloses a ceramic article made from a ceramic material (alumina), treated with silane, and heated to produce a hydrophobic material.

Claims 45, 47 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Japan-01016703.

Japan discloses a ceramic article made from a ceramic material, treated with silane, and heated to produce an antimicrobial material.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tully et al, alone.

Tully does not disclose the ceramic article to be from the list claimed, however, it would have been an obvious design choice to use the article as a gel holder, gel support, or microarray plate, since these items are well known to be made from ceramic material.

Claims 46, 48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japan-703, alone.

Japan does not disclose the ceramic article to comprise alumina or be from the list claimed. However, to substitute alumina for the claimed ceramic material would have been an obvious design expedient since alumina is well known to be used in the ceramic art. Furthermore, it would have been an obvious design choice to use the article as a gel holder, gel support, or microarray plate, since these items are well known to be made from ceramic material.
